

I think XM having traffic channels is a good thing. Some people ONLY have an XM radio in their vehicles and they need to hear the traffic too. I have listened to the traffic channels while in traffic for that particular city and their traffic reports are FAR more accurate than the reports on the local radio stations. Personally, I feel that XM is doing a great service to their listeners and it would be a GREAT injustice to us AND the constitutions that us Americans used to hold so dear to make XM take their traffic channels off the air. So many of our basic freedoms have been taken away in the last 15 years so let us keep this one! I have two XM radios and I know of several others that do too. Country music legends, George Jones and Merle Haggard, both have one in every vehicle they own. I don't know about them, but I would protest taking these channels off the air and I'm sure I could rally some support for the cause.
